

## N7D420: Exploring the New Features of IBM Lotus Domino Designer 7

1 Day / \$550 (plus tax on printed courseware)

### Summary Description:

Using lecture and hands-on activities, this 1-day, instructor-led course presents the new features and enhancements in IBM Lotus Domino Designer 7. Upon Completion of this course, you should be able to describe and demonstrate how these new features can be implemented in Domino 7 applications.

### Prerequisites

- Experience creating Domino 6/6.5 applications for Notes and the Web
- Experience coding in Java and JavaScript, or LotusScript is a plus but not required

### Topics Covered

- Domino Designer Enhancements and New Features
- Programming Enhancements
- Exposing Domino Data in DB2
- Reading Data from DB2
- Creating Web Services

### Audience

Application developers who have experience developing Domino 6/6.5 applications for Notes and the Web and who wish to learn about the new features in Domino Designer 7.

## About WorkFlow Studios

WorkFlow Studios is a Premier IBM Business Partner, reseller of IBM software, and Education Center for IBM Software (ECIS).

### Education Center for IBM Software (ECIS)

Our education business is driven by the recognition that the best training environment is one that creates hands-on learning opportunities that dive deep below the surface of the courseware. Our instructors are also consultants who share their expertise and experience in classroom demonstrations of real-world solutions.

Our commitment to you as a student of WorkFlow Studios is simple:

- You will learn from the best in a hands-on, first-class training environment
- We'll dive deep beyond the surface level of the courseware to share our insight and first-hand consulting experience with the topics you'll be learning
- We'll give you access to the latest and greatest technologies in our labs

WorkFlow Studios is authorized to teach the full-suite of IBM's Lotus and WebSphere brand curriculum.

### Software Reseller

We are committed to helping organizations like yours establish a successful strategy for licensing software at a good value. In today's tightened economy, managing software as an asset rather than as an expense has become critical. Failing to carefully manage software assets can cost businesses several times more than the cost of the software itself. It's that simple. We understand how to make sure you get the most value for your money whether it's a new software purchase or a renewal.

### Services

WorkFlow Studios delivers creative, innovative, and cost-effective IT services and solutions to support your business. Our approach to your business challenge is simple. We learn everything we can about your business, study the challenge from every angle, then propose an elegant solution designed to fit your budget, timeline, and the personality of your business. We'll follow that up with our proven experience to deliver on what we promise. Our services include:

- Application development
- System integration including Web services, EDI, host integration
- System administration and troubleshooting
- System architecture and design
- Staff mentoring
- Staff augmentation
